

Active Shooter Counter Terror Course

Why?

Recent years have seen an *increase of terror attacks* in the active shooter scenario.

Whether it is a religiously motivated terrorist shooting civilians in a public place, a mentally ill individual shooting up a public place or a criminal acting violently in a robbery gone bad.

This threat is real and it happens more and more often.

Off course, the statistical chance of you as an individual getting stuck in such an attack is small.

But so is the chance of your house burning down but still we all have a fire insurance on our house.

We believe it's *not a question of calculating the chance* of getting involved in such an attack but more so it's a question of preparing yourself for the worst and developing the *skills and mindset* to be able to effectively counter any type of violence aimed towards you or your loved ones.

In this case learning it in such an intense scenario as a terror attack but applicable to so many more situations.

"I didn't know exactly what to expect but this course has blown my mind. I have learned much more than I could ever imagine"

Who?

TAC Training has an extensive body of knowledge in this field gained through close cooperation with *the Israeli Security Services* which, having combated this type of threat for many decades, have come up with the most effective training for this specific type of threat.

In Israel this training is given to all counter-terror units, Diplomatic Security and Security for vulnerable locations.

We have taken this training as a base and *modified it* to be specifically suitable to the European state of affairs. Also we have modified it in such a way that we make the most progression in the students at the shortest possible time.

Our training takes you from the scenario of being either an unarmed civilian or security personnel and gives you training and solutions on the three options in such a scenario; *'Run-hide-fight'*.

The other perspective we work from is that of an armed security personnel or single armed Police Officer.

"It's an amazing experience to be able to train as close to reality as possible through the different drills and programs, this truly has broadened my mind and changed my personality"

The training consists of *42 hours of training* over a span of three days. During this time we will spend around 2 hours in the classroom and for the remainder of time taking you through about 40 hours of training on *the fight option*.

This means you will do military Krav Maga, aimed at getting close to the attacker and *taking his weapon from him*.

From that point we will teach you the Israeli combat shooting which is acknowledged worldwide as the most effective single operator fighting method.

You will learn to use a wide array of firearms such as the Glock pistol, the AK47 rifle, the M4 rifle and the MP5 machine pistol.

We will spend *many hours on the shooting range* performing drills teaching you to aggressively, dynamically and safely use these firearms to take down any terrorist.

But most importantly we will use our advanced training village to train on many scenario's and teach you the use of *Close quarters combat (Israeli CQB Tactics)*.

These scenarios are what will transform you from someone who knows how to use a firearm into the person that can withstand the stress and actually spring into action *when the time calls*.

“Being ex-military I didn't think I would have to learn to shoot, but now I see that fighting as a single operator in a dynamic scenario is a whole different world from what I was trained in while serving”

How?

Interestingly enough our course participants testify that doing this course has done *much more* for them than just preparing them for a terrorist attack.

For many it has *changed their life* in a positive way where they now have more focus in life, are better in setting priorities and are more effective in their everyday life.
